Design Information:

The SMO14-2 features 14 cubic feet of economical oven space (consider the SMO14HP-2 for the same amount of space with superior uniformity). The independent overtemperature safety feature is user adjustable and provides added safety. The forced, blower-assisted airflow design offers excellent temperature uniformity and fast recovery. A turbo blower and heavy-duty motor combine to direct air over the shelves and samples for even, constant drying, curing and baking. These units are especially ideal for glassware drying.
