Design Information:

The SMO5 is equipped with a stainless steel interior for long life operation and easy cleaning. With triple wall construction, this oven's walls minimize external wall temperature which meets CE requirements to keep work-spaces cool. These ovens are recommended for critical and analytical use in laboratory and pilot plant product research. Typical applications for the oven include aging, asphalt testing, curing, drying, pre-heating, conditioning and life cycle testing.

This unit has a quick ramp-up time to 306°C for faster cycle times. This unit includes an advanced PID temperature control system for sensitive response.
